

News feed page where people can create and read news. The news can be sorted according to time, section/tag and location. News include headline, content, date, location and tags for groups/interests. Tags can be e.g. Studies, Work, Events, Sports etc. Creating a news item will be simple and happen in one view. News are shown in a feed that can be sorted according to users wants and needs, otherwise all added news will be shown.

Designed for web browser to be used with mobile device, laptop or table computer.
